ACHIEVEMENTS

- **2nd Place Dell × Google Developer Groups Ideathon (Hackathon):** Built a Multi-Agent Parliament on LangChain to verify social media claims for a problem statement authored by Dell engineers who judged prototypes across 3 competitive rounds. [[View Certificate](#) / [Photo](#)]

PROJECTS

Social Media Claim Checker

[Live](#) | [GitHub](#)

LangChain, Multi-Agent Systems, RAG Pipeline, Web Scraping, Next.js, Vercel

A Multi-Agent Parliament system built with LangChain that automates social media fact-checking; social media claims are debated by two AI agents over 4 turns, while a Judge agent runs its own web-scraping pipeline to retrieve live information and deliver a final evidence-backed verdict.

BachatBox — Personal Finance Assistant

[Live](#) | [GitHub](#)

Flask, LangChain, Multi-Agent, Clerk, OCR, RAG, React, Tailwind, Vercel

A modern finance management application with LLM dashboards, OCR-based receipt parsing, transaction CRUD, equity and stock management, and a Financial Claim Verification Multi-Agent Parliament. Built in 2 days for Hacks 10.0.

BioLuminescence — ML Microscope App for Embedded Systems

[GitHub](#)

Raspberry Pi OS, Faster R-CNN, Flask, PostgreSQL, React, Next.js, Tailwind CSS

ML-based microorganism identification system with a Flask + Faster R-CNN backend and Next.js frontend for image upload and results visualisation; built for low-power Raspberry Pi deployment for fast field and lab workflows. Developed for Smart India Hackathon 2025.

QOTD-le — Gamified DSA Trainer

[Live](#) | [GitHub](#)

Next.js, React, Tailwind CSS, Adaptive Difficulty, Gamification

A Wordle-inspired daily DSA challenge platform with multiple animations and a clean grid-based React frontend; showcases design principles and high-quality UI engineering built for competitive exam mastery such as GATE.

Voice Assistant Template

[Live](#) | [GitHub](#)

Next.js, TypeScript, Web Speech API, VAD, TTS, LLM API Routes

Production-quality conversational voice agent built on a single `page.tsx` and 3 plug-and-play API routes covering STT, LLM inference, and TTS; implements browser-side conversation memory for stateful context, real-time Voice Activity Detection to detect speech pauses, and barge-in handling that immediately silences TTS the moment you speak. Zero Docker or heavy dependencies.

WORK EXPERIENCE

Frontend Developer Intern — Techlearn Solutions

8 Weeks

Contributed to the frontend development of the company's main web platform using React and Vite.js; responsible for building and delivering a significant portion of the UI across multiple pages, modernised the component designs while adhering to core design principles adopted throughout the product.

EDUCATION

2027 - B.Tech AIML at **Manipal University Jaipur**

CGPA: 7.56

2022 - CBSE 12th Board at **Venkateshwar International School**

74.8%

2020 - CBSE 10th Board at **Venkateshwar International School**

94.6%

CERTIFICATIONS

- The Odin Project: HTML5/CSS3 (Flexbox), Git/GitHub workflows, PostgreSQL, React, APIs
- Completed [LearnCpp.com](#) and authored my own [Complete C++ Reference Documentation](#)
- NPTEL Design and Analysis of Algorithms: [Jan–Mar 2025](#) NPTEL25CS23S342700493
- NPTEL Data Structures and Algorithms using Java: [Jul–Oct 2024](#) NPTEL24CS96S351800419
